About Us

We are a team of forward-thinking technology experts dedicated to helping businesses transform through **product innovation, intelligent automation, and AI-driven scalability**.

At our core, we believe that automation is not just about efficiency—it's about enabling innovation. By automating repetitive and time-consuming processes using **Robotic Process Automation**, we free up valuable human potential to focus on creativity, strategy, and building impactful products.

Our approach combines the power of automation with intelligence. While RPA acts as the foundation—handling structured, rule-based tasks with speed and accuracy—we go a step further by integrating **Artificial Intelligence** to bring adaptability and decision-making into the process.

This is where true transformation happens.

With AI as the driving force, we enable businesses to scale beyond traditional automation. From interpreting unstructured data to managing complex workflows and making predictive decisions, our solutions are designed to evolve with your business and support long-term growth.

Innovate Products. Automate with RPA. Scale with AI — Faster. Smarter. Better.

- **Innovate Products**
We design and build modern, high-quality software products tailored to business needs.
- **Automate with RPA**
We reduce manual work by automating repetitive tasks using **Robotic Process Automation**, improving efficiency and accuracy.
- **Scale with AI**
We use Artificial Intelligence (including advanced/agent-based AI) to help your business grow faster, make smarter decisions, and handle increasing demand.

 vSuite is an integrated set of business products that streamline finance, workforce, commerce, and logistics in one powerful ecosystem more	 We automate repetitive tasks, connect systems, and optimize workflows—so your business runs faster, smarter, and with less effort more	Our AI offerings include LLM model development, retrieval-augmented generation (RAG) solutions, AI consulting, and intelligent automation—designed to enhance decision-making, optimize operations, and accelerate digital transformation more

vSuite of Products

vSuite Finance - Tag Line : “Smarter Finance Starts Here.”

vSuite Finance powers your business with smarter billing, seamless accounting, and automated payroll—so you can focus on growth, not complexity.

vSuite Billing - **Smart, fast, and GST-ready billing designed for modern businesses.**

Billing enables businesses to create professional invoices, manage payments, and streamline billing workflows with minimal effort. Built with automation and real-time tracking, it ensures faster billing cycles and improved cash flow visibility.

Key Highlights

- Instant invoice generation with GST compliance
- UPI / QR-based payment support
- Automated payment reminders & status tracking
- Recurring billing & subscription management
- Real-time sales dashboard & insights
- WhatsApp/email invoice sharing
- AI-assisted invoice creation (next-gen feature)

vSuite Accounting - Comprehensive accounting made simple, intelligent, and scalable.

Accounting provides a complete financial management system to handle ledgers, expenses, and reporting—all in one place. Designed for accuracy and clarity, it empowers businesses with real-time financial insights and automation.

Key Highlights

- General ledger, journal entries, and financial records
- Expense tracking & smart categorization
- Profit & loss, balance sheet, and cash flow reports
- GST reports and compliance support
- Bank reconciliation automation
- Multi-user access with role-based controls
- AI-driven financial insights & forecasting (future-ready)

vSuite WorkForce - Tag Line : “ TBD ”

A unified workforce management solution designed to **simplify people operations**—from payroll processing to employee lifecycle management. Workforce combines automation, compliance, and insights to help organizations manage their teams efficiently and scale with confidence.

vSuite Payroll - Accurate, automated, and compliant payroll for modern organizations.

Payroll streamlines salary processing, statutory compliance, and employee payments with precision and speed. Built to reduce manual effort and errors, it ensures timely payroll while maintaining full compliance with regulations.

Key Highlights

- Automated salary calculation (earnings, deductions, taxes)
- Statutory compliance (PF, ESI, TDS)
- Payslip generation & secure employee access
- UPI/bank transfer integration for salary disbursement
- Reimbursements & bonus management
- Payroll reports & audit-ready records
- AI-assisted payroll anomaly detection (next-gen feature)

vSuite Human Resources - Smart HR management to engage, manage, and grow your workforce.

Human Resources simplifies the entire employee lifecycle—from onboarding to performance tracking—while improving visibility and employee experience. It centralizes all HR activities into a single, easy-to-use platform.

Key Highlights

- Employee onboarding & digital records management
- Attendance & leave tracking
- Performance management & appraisals
- Document management & employee self-service portal
- Role-based access & approval workflows
- Analytics on workforce productivity & trends
- AI-driven insights for hiring and retention (future-ready)

vSuite Commerce - Tag Line : “ TBD ”

A unified commerce platform designed to help businesses **sell smarter, scale faster, and deliver seamless customer experiences**. From online storefronts to order management and payments, Commerce brings everything together in one powerful ecosystem

vSuite E-Commerce - Build, manage, and grow your online business—effortlessly.

E-Commerce enables businesses to create modern online stores, manage products, process orders, and deliver exceptional shopping experiences. Designed for flexibility and scalability, it supports businesses at every stage of their digital journey.

Key Highlights

- Easy storefront creation with customizable themes
- Product catalog management (variants, pricing, offers)
- Seamless cart & checkout experience

- Multi-payment support (UPI, cards, wallets)
- Order tracking & fulfilment management
- Customer management & engagement tools
- Mobile-friendly & responsive design
- AI-powered product recommendations
- Personalized shopping experiences
- Abandoned cart recovery automation
- Integrated analytics & sales insights
- Omnichannel support (web, mobile, social commerce)

vSuite Logistics - Tag Line : “ TBD ”

A smart logistics automation solution designed to **streamline shipping operations, eliminate manual processing, and ensure accurate financial integration**. From document retrieval to reconciliation, Logistics enables businesses to manage high-volume operations with speed and precision.

vSuite Process Flow - Automate logistics documents—from retrieval to reconciliation.

Process Flow transforms how businesses handle **Bill of Lading (BL)** and **Invoice processing** by automating the entire workflow—from downloading documents to updating ERP systems. It eliminates manual effort, reduces errors, and accelerates financial operations.

Key Highlights

Automated Document Retrieval

- Auto-download BL and invoices from multiple vendors/portals
- Supports email, API, and web-based sources
- Vendor-wise configuration and scheduling

Intelligent Data Extraction

Data Validation & Matching

- Validate extracted data against business rules
- Match BL with corresponding invoices
- Detect missing or inconsistent data
- Exception handling & alerts

ERP Integration (Payments & Receipts)

- Push validated data directly into ERP systems
- Supports integration with finance systems like billing & accounting modules

Automation

An intelligent automation layer designed to **eliminate manual work, streamline business processes, and connect systems seamlessly**. Automation empowers organizations to operate faster, reduce errors, and scale efficiently through RPA, workflows, and integrations.

RPA (Robotic Process Automation) - Automate repetitive tasks with precision and speed.

RPA enables businesses to automate rule-based, repetitive activities such as data entry, document handling, and system interactions—without changing existing systems. It reduces human effort and ensures consistent execution across operations.

Key Highlights

- Automate data entry across multiple systems
- Screen scraping and legacy system automation
- Scheduled and event-driven bots
- High-volume task processing with zero errors
- Exception handling and retry mechanisms
- Audit logs for traceability

Advanced Capabilities

- AI-assisted bots for semi-structured data
- Self-healing automation (adapts to UI changes)
- Bot performance monitoring & analytics

Workflows - Design, automate, and manage business processes end-to-end.

Workflows allow organizations to define structured processes with approvals, conditions, and automation—ensuring consistency and visibility across operations.

Key Highlights

- Visual workflow builder (drag-and-drop)
- Multi-step approval processes
- Conditional logic and branching
- Task assignments and notifications
- SLA tracking and escalation rules
- Real-time process monitoring

Advanced Capabilities

- Dynamic workflows (AI-driven decisioning)
- Cross-module workflows (Finance, HR, Logistics)
- Low-code/no-code customization

AI Offering

An advanced AI capability layer designed to **transform business operations with intelligence, automation, and decision-making power**. From building custom AI models to deploying real-world solutions, AI Offering enables organizations to innovate, automate, and scale faster.

LLM Development - Build intelligent applications powered by Large Language Models.

LLM Development focuses on creating custom AI solutions that understand, generate, and interact with human language—tailored to your business needs.

Key Highlights

- Custom LLM-based application development
- Chatbots, virtual assistants, and copilots
- Document understanding and summarization
- Natural language query interfaces
- Multi-language support

Advanced Capabilities

- Domain-specific fine-tuning
- Secure and private AI deployments
- Integration with enterprise systems
- Context-aware responses with memory

RAG Solutions (Retrieval-Augmented Generation) - Deliver accurate, context-aware AI responses using your data.

RAG Solutions combine AI models with your business data to provide reliable, real-time, and context-rich outputs—ideal for knowledge-driven use cases.

Key Highlights

- Connect AI with internal documents and databases
- Semantic search and intelligent retrieval
- Real-time knowledge grounding
- Secure data access and control

Advanced Capabilities

- Vector database integration
- Continuous knowledge updates
- Multi-source data aggregation
- High-accuracy response generation

AI Consulting - Strategic guidance to adopt and scale AI effectively.

AI Consulting helps organizations identify the right AI opportunities, define roadmaps, and implement solutions aligned with business goals.

Key Highlights

- AI readiness assessment
- Use case identification and prioritization
- Architecture and solution design
- Implementation roadmap
- ROI and performance evaluation

Advanced Capabilities

- Industry-specific AI strategies
- Governance, compliance, and ethical AI
- Change management and training

AI Automation - Combine AI with automation to create intelligent workflows.

AI Automation enhances traditional automation by adding decision-making capabilities, enabling systems to handle complex and unstructured tasks.

Key Highlights

- Intelligent document processing (IDP)
- AI-driven workflow automation
- Decision automation with ML/AI
- Integration with RPA and business systems

Advanced Capabilities

- Self-learning automation systems
- Predictive process optimization
- Event-driven intelligent workflows
- Cross-module automation (Finance, HR, Logistics)

□ ABOUT vSuite Billing

vSuite Billing is a modern, GST-ready billing and accounting solution built to streamline financial operations for businesses of all sizes. From invoicing and inventory to accounting and analytics, it provides everything you need to manage your business efficiently in one platform.

KEY FEATURES

□ Billing & Invoicing

- GST-compliant invoices (CGST, SGST, IGST)
- Quick bill generation
- Barcode / QR billing
- Multiple payment methods
- Print & Email invoices
- Credit & Debit notes

Inventory Management

- Real-time stock tracking
- Low stock alerts
- Batch & expiry tracking
- Supplier management
- Multi-warehouse support

Sales & Reports

- Daily / Monthly reports
- Profit & Loss
- Item-wise sales
- GST reports
- Cash flow insights

Customer Management

- Customer database
- Credit tracking
- Loyalty programs
- Purchase history

Employee Management

- Staff roles & login
- Attendance tracking
- Sales performance

Multi-Store Management

- Multi-branch handling
- Centralized reporting
- Stock transfers

Accounting

- Ledger management
- Balance sheet
- Bank reconciliation

Industry Features **Restaurant**

- Table management
- KOT system
- Online order integration
- Menu management

Retail

- Barcode scanner support
- Discounts & offers
- Fast checkout

SMART & AI-DRIVEN FEATURES

- AI Invoice Auto-Creation
 - Generate invoices from PO, email, or WhatsApp
- Smart Expense Categorization
 - Auto-tag expenses intelligently
- Cash Flow Prediction
 - Forecast future financial position
- Anomaly Detection
 - Detect unusual transactions instantly

MOBILE & ACCESSIBILITY

- Full mobile app (offline mode)
- Voice-based billing
- WhatsApp integration (invoices & reminders)

PAYMENT & FINANCIAL INTEGRATION

- UPI / QR payments (India-ready IN)
- Payment gateway integration (Razorpay, Stripe, PayPal)
- Auto payment reminders

ADVANCED BILLING

- Subscription billing
- Multi-currency & multi-language
- Dynamic pricing rules
- E-invoicing & GST automation

ANALYTICS & INSIGHTS

- Real-time dashboard
- Customer insights
- Profit margin analysis
- Inventory + billing sync

SECURITY & CONTROL

- Role-based access
- Audit logs
- Cloud backup
- Biometric login (mobile)

BUSINESS WORKFLOWS

- Quotation → Invoice conversion
- Purchase order management
- Vendor management
- Approval workflows

INTEGRATIONS

- Accounting tools (Tally, QuickBooks)
- CRM integration
- E-commerce integration

UNIQUE FEATURES

- Customer self-service portal
- Loyalty & rewards
- Geo-tagged billing
- Digital signature
- Scan & bill (QR/barcode)

IN INDIA-SPECIFIC FEATURES

- GST return support (GSTR-1, GSTR-3B)
- E-way bill generation
- HSN/SAC suggestions
- Regional language invoices

WHY CHOOSE vSuite Billing

- GST-ready & compliant
- Built for India & global use
- All-in-one billing + accounting
- Scalable for any business
- AI-powered automation

HOW IT WORKS

1. Add products, services, and customers
2. Generate invoices instantly
3. Track payments & inventory
4. Analyze reports and grow your business

BENEFITS

- Faster billing process
- Reduced manual errors
- Better financial control
- Improved cash flow visibility
- Scalable growth

vSuite

ProcessFlow

Logo:

Headline

Automate Shipping Documents. Simplify Financial Operations.

Subheading

vSuite ProcessFlow automates the retrieval, extraction, and integration of Bill of Lading (BL) and invoices—eliminating manual effort and accelerating your finance workflows.

CTA Buttons

-  Request Demo
-  See How It Works

CORE CAPABILITIES

Automated Document Retrieval

Automatically fetch Bill of Lading (BL) and invoices from portals, emails, or integrated systems for specific customers or vendors.

Smart Data Extraction

Extract key information such as:

- BL Number
- Shipment details
- Invoice values
- Dates and parties

Using intelligent OCR and API-based parsing.

System Integration

Seamlessly push extracted data into:

- Payment systems
- Receipt systems
- Accounting platforms

Eliminating manual data entry.

Reconciliation & Reporting

Monitor and manage:

- Missing or delayed documents
- Payment mismatches
- Shipment vs invoice status

All through a unified dashboard.

WHY CHOOSE vSuite ProcessFlow

-  Eliminates manual document handling
-  Reduces human errors
-  Speeds up finance operations
-  Improves reconciliation accuracy
-  Scales with shipment volume

WHO IS IT FOR?

- Shipping & Logistics Companies
- Freight Forwarders
- Import/Export Businesses
- Finance & Accounts Teams

HOW IT WORKS

1. Connect source (portal / email / API)
2. Automatically download BL & invoices
3. Extract structured data
4. Sync with financial systems
5. Track and report insights

BUSINESS IMPACT

“Turn Shipping Documents into Financial Intelligence with vSuite ProcessFlow”

-  Reduce processing time by up to 70%
-  Minimize manual errors
-  Accelerate payment reconciliation
-  Improve operational visibility

SECURITY & COMPLIANCE

-  Secure document handling
-  Role-based access control
-  Complete audit logs

- ☁ Cloud or on-prem deployment

✳ KEY DIFFERENTIATORS

- End-to-end automation (Download → Extract → Sync)
- Built specifically for shipping workflows
- Deep integration with financial systems
- Scalable for high-volume operations

★ TESTIMONIALS

“We reduced hours of manual work to minutes with vSuite ProcessFlow.”

— Logistics Operations Team

“Accurate extraction and seamless integration made reconciliation effortless.”

🌐 Why Choose Vishva Technologies?

🔗 1. Outcome-Driven Product Engineering

At **Vishva Technologies**, we don't just build software—we build **business solutions** that deliver measurable results.

We handle:

- End-to-end product development (idea → design → development → deployment)
- Web, mobile, and enterprise applications
- Scalable and secure architectures

👉 *You get a product that works in the real world, not just on paper.*

⚙ 2. Intelligent Automation (RPA)

Manual processes slow businesses down. We automate them.

What we automate:

- Repetitive business workflows
- Data entry and processing
- Report generation
- System integrations

Benefits:

- ⌚ Saves time
- 💰 Reduces operational cost
- 🎯 Improves accuracy

👉 *Your team focuses on value, not repetitive work.*

🤖 3. Agentic AI Capabilities

We bring next-gen **AI-powered systems** that go beyond automation.

Our AI solutions can:

- Analyze large data sets
- Make decisions based on rules and learning
- Continuously improve performance

Use cases:

- Smart assistants
- Predictive analytics
- Intelligent workflows

👉 *Your business becomes smarter and self-evolving.*

4. Customized Solutions

No two businesses are the same—so why use generic software?

We provide:

- Tailor-made solutions
- Industry-specific customization
- Flexible and modular systems

👉 *Everything is built around your exact needs.*

5. Speed + Quality Delivery

We follow modern development practices:

- Agile methodology
- Continuous integration & deployment
- Automated testing

Result:

- Faster time-to-market
- Reliable and high-quality systems

6. Long-Term Technology Partnership

We don't just deliver and disappear.

We:

- Understand your long-term vision
- Provide ongoing support
- Continuously optimize your systems

👉 *We grow as you grow.*

7. Scalable & Future-Ready Solutions

Your business will evolve—your software should too.

We ensure:

- Easy scalability
- Cloud-ready architecture
- Future technology integration

8. Innovation-First Culture

We actively encourage:

- New ideas
- Continuous improvement
- Customer-centric innovation

👉 *We don't just follow trends—we help create them.*

Our Core Promise

Innovate Products. Automate with RPA. Scale with AI — Faster. Smarter. Better.
